General Information

Short summary

A company from eastern Poland provides light therapy services. The company has created its own line of products for tanning in solariums: tanning accelerators, multi-bronzers, bronzers. They are looking for manufacturers of natural body and hair care cosmetics (creams, balms, shampoos, conditioners) in order to expand the assortment in stationary salons.

Full description

The company is a leader among Polish companies operating in the light therapy industry. Currently the company operates 13 tanning salons. The company offers the following products: tanning accelerators, multibronzers, bronzers. The cosmetics are available in 200ml bottles and 15ml sachets. Thanks to the small capacity of the product, it is possible to test its effectiveness. The cosmetics are designed for people with different skin tones. The company also offers tanning cream to use in the solarium for people who want to protect their tattoo from fading. Each cream has a unique scent, spreads easily and absorbs quickly.

In addition, the company has collagen lamps for tanning devices, which open up completely new possibilities in the field of cosmetic treatments because this device rejuvenates and regenerates not only a specific part of the body but the entire body. The light of collagen lamps enables effective skin rejuvenation because it is absorbed by fibroblasts and stimulates their production of collagen, elastin and hyaluronic acid. The result is luminous and firm skin all over

the body. What is more, the device does not emit UV rays and therefore does not tan.

Advantages and innovations

The company has extensive experience gained over 21 years and the trust bestowed upon them by their customers. Their strong point is the team consisting of specialists in the field. The offered cosmetics do not contain parabens and have been dermatologically tested. Ingredients of natural origin support the tanning process and care for the skin, in particular: provide it with deep hydration and regeneration, light it up, delay aging processes, strengthen and preserve the tan.

Technical specification or expertise sought

The company is looking for manufacturers of natural body and hair care cosmetics (creams, balms, shampoos, conditioners) to establish a business cooperation.
